PRODUCT ENGINEER

At Renalto, an investor-backed startup at Station F, I was one of three engineers working directly with the founders. I shipped onboarding and a partner product, owned a referral program and built a design system adopted by the team. I work across product decisions, design and full-stack development, from scoping to launch and measurement. My background in production operations at Nickelodeon, brand and motion design at Interbrand, and teaching in Madrid shapes how I make complex software understandable.

CORE EXPERTISE

Product & Business	Full-Stack & Mobile	AI Workflows
Product scoping, onboarding, partner launches and activation tracking.	Full-stack SaaS, mobile UX, payments and design systems.	LLM evaluation, voice interfaces and document confidence checks.
Figma · Mixpanel · PostHog · Segment · Loops · Stripe · Webflow · Shopify	TypeScript · React · React Native · Next.js · Node.js · Supabase · Postgres · Vercel	OpenAI · Vercel AI SDK · LangChain · Supabase Vector · Whisper · ElevenLabs

PROFESSIONAL EXPERIENCE

RENALTO, Paris, France (Station F) · *Full-Stack AI Engineer*; May 2025 – July 2026

AI quoting for construction tradespeople, sold directly and through partners.

- To help tradespeople finish a first quote on their phones, I designed and shipped a guided flow for voice, text and documents, refined it from user feedback, and built onboarding with activation tracking.
- I built our largest partner's redesigned quoting assistant from their design, demoed it and launched it to all their beta users.
- I owned the referral program from scoping through launch, comparing three approaches and shipping a first version with attribution, credit rewards and Mixpanel tracking. Results showed limited uptake.
- For complex tender documents (DPGF), I built and shipped a guided flow over the existing parser with confidence checks, price sources and source previews. Users could inspect the output and answer questions that reran the LLM analysis.
- I built most of the in-app Stripe flow, covering subscription states, cancellation and post-payment journeys.
- I built the design system and shared AI coding rules for consistent, accessible interfaces; teammates adopted both.
- In 2025, we shipped 51 production releases, cut targeted AI quote edits from 30–60 seconds to ~5 seconds, and reduced time to first quote from 1.5 days to 9 hours.

WE SOLUTIONS, Dallas, USA (remote) · *Technical Lead & Product Partner*; September 2019 – Present

Shaped product direction with the founder; delivered the website and book launch. Built an unreleased React Native iOS prototype.

FREELANCE PRODUCT DEVELOPMENT, New York / Texas, USA · *Full-Stack Developer & UX/UI Designer*; 2019 – 2021

Built responsive UI and Shopify checkout for Figgy's rebrand; delivered JPIIHS's website, logo system and interactive campus tour.

SPANISH MINISTRY OF EDUCATION, Madrid, Spain · *TEFL Certified Language & Culture Ambassador*; 2018 – 2020

Taught 12 classes, working daily in Spanish with faculty and administration.

INTERBRAND, New York, USA · *Design & Creative Intern*; 2017

Led the Rubin Museum's 2018 brand campaign from research through client presentation.

NICKELODEON (VIACOM), New York, USA · *On-Air Production Operations Intern*; 2016

Managed media-library requests against 2-hour service deadlines.

SELECTED PROJECT

i-CANTO · *Founder & CTO* · icanto.tech

I designed and launched an AI language-learning app that turns songs into interactive lessons, lyric translations and vocabulary practice. As the sole developer, I own product direction, interaction design and the full React/Next.js stack, from APIs and Postgres to authentication and Stripe subscriptions. I track usage, retention and estimated AI costs in PostHog.

EDUCATION

SAINT LOUIS UNIVERSITY, St. Louis, USA · *Multimedia Design & Communications, Journalism, Spanish*

IRONHACK, Barcelona, Spain · [Full-Stack Web Development Certification](#) · *React, Express and test-driven development*

LANGUAGES

English — Native

Spanish — Fluent
